

APPLICATION TO THE NOBEL COMMITTEE

I am Philip Mikhailovich Kanarev. Russian, retired, professor. I wrote two textbooks:

- 1. UNIVERSITY TEXTBOOK IN PHYSICS AND CHEMISTRY- 460 pages.**
- 2. THE SCHOOL TEXTBOOK IN PHYSICS AND CHEMISTRY 205 pages.**

BELOW IS THE TEXT OF THE ADVERTISEMENT FOR THESE TEXTBOOKS IN ENGLISH. IF YOU ALSO NEED TEXTBOOKS IN ENGLISH? LET ME KNOW. WE CAN QUICKLY TRANSLATE THEM INTO ENGLISH USING A COMPUTER.

THE FIRST STEP OF RUSSIA FROM DEEPLY WRONG SCIENTIFIC AND EDUCATIONAL STATE.

This version of the article is translated into English using a computer. If it needs to be improved, the second version of the translation will be corrected by the translator. Please let us know if this is necessary or not?

KANARYOV F. M.

Yesterday, 27.01.2021 my website <http://www.microworld.su/> was unexpectedly visited by 259 readers. It is the first Russian step from deeply wrong scientific and educational state.

Being a citizen of Russia, I feel the duty to inform Russians on a condition of matters of state which arise and decidesimilar cases.

I already created a scientific and educational gift to all Russians of the Fatherland: The latest School Physical and chemical Textbook (205 p.) and the Latest University Physical and chemical Textbook (450 p.).

I wrote these textbooks about 10 pension years. Follows from them that the Russian textbooks existing now form such knowledge which educational documents secretly begin with the word MORONIC at the Russian youth.

School students receive MORONIC SCHOOL-LEAVING CERTIFICATES, and engineers of all profiles - MORONIC DIPLOMAS of ENGINEERS.

It became known to the Scientific and Educational Power of Russia more than three years ago. But she takes only the first step for correction of this state.

Dear Russians, I on the finish of life. To me 84 years. My scientific and educational intelligence and the state sense of responsibility oblige me to inform you that scientific and educational life of Russia is more than 3 years in the WRONG INTELLECTUAL STATE.

My SCIENTIFIC and EDUCATIONAL INTELLET allows me to inform you that my next death will not stop use of my specified textbooks worldwide.

Involuntarily there is a question of participation of the Highest Government of RUSSIA in regulation of this question. Its participation spontaneously becomes history of this process as the powerful hidden opponent of the leading Russian scientific and educational intelligence.

History of this question is formed such at which the carrier of the leading Russian scientific and educational intelligence forms the maximum scientific and educational authority to the Fatherland - Russia, and the Higher Russian Authority actively brakes feasibility of its this activity.

The situation described by me already strongly samozapisatsya in the Scientific and Educational History of Russia and nobody will change it any more.

Unfortunately the Russian imperious scientific and educational mistake is based on the American scientific and educational history.

1977 the famous American physicist and the political figure Bendzhiamin Franklin offered concepts of a positive and **negative charge of electricity.**

He generalized results of the experiments and formulated as follows.

1. Electric substance consists of extremely small particles as it is capable to get into ordinary matter, even in the most dense metals, with big ease and freedom, without encountering at the same time noticeable resistance.
2. Particles of electric substance mutually push away each other, but they are strongly attracted by all other matter.
3. Ordinary matter contains (usually) so much electric substance how many it can comprise. If to add it also this substance, then it will be placed on a surface and forms what we call the electric atmosphere; in this case say that the subject is electrified.

Franklin wrote: "To electrify plus or minus, it is required to know only that parts of a tube or a sphere which are rubbed attract electric fire at the time of friction and, so take away it from a subject which makes rubbing; the same parts as soon as their rubbing stops, seek to give fire received by them to any subject with its smaller quantity".

Russia Georg Wilhelm Richman and Mikhail Vasilyevich Lomonosov were engaged in similar experiments, results of their researches began to be published by the St. Petersburg academy of Sciences in 1751.

My continuation of scientific and educational results of the mentioned great scientists of the time considers their wrong physical representations.

Of course, I am depressed by the created wrong scientific and educational situation, and the higher Russian authorities in power show content it.

I tried to present thus graphically results of the scientific and educational activity (fig. 1).

height of a package of pages of the electronic manuscript of the Latest School Textbook in Physics and Chemistry of 205;

height of a package of pages of the electronic manuscript of the Latest University Textbook in Physics and Chemistry of 450; The 3rd draft copies of working manuscripts of textbooks;

packs of printersky paper.

Wrote textbooks about 10 pensioner years. Considered quantity of the bought packs of printersky paper approximately. I remember that they were more than 30=150000 sheets. All used electronic manuscripts did not manage to be kept.

Volume of my intellectual work (electronic manuscripts) approximately $(205+450) = 655$. Conditional efficiency of my scientific and educational work $(655 \times 100) / 150000 = 0.44$.

Fig. 1. The scheme for assessment of efficiency of my intellectual work:

The fundamental science already established that inhabitants of a microcosm are connected among themselves by constants. Their constancy – an ideal **kriterialnost of reliability**.

Let's take, for example, an electron. **Functionally** it is connected with a proton, a neutron, an atomic nucleus, with atom, a molecule, a photon and so on. In all mathematical models connecting an electron with other inhabitants of a microcosm, the constants. Mathematical models connect them among themselves. At an electron, for example, - them 23 . It means that, the revealed **structure of an electron is reliable. From the received** set of constants of an electron it is impossible to reveal other structure of an electron. It can only be specified. All **constants of an electron enter mathematical models of the constants and mathematical models of other constants, but their greatest number in mathematical models of constants of a photon.**

So, secretly opposing the newest theory of a microcosm, the Russian intellectual strekbreykher openly block the Russian scientific educational progress, brightly showing all absence at themselves mental scientific ability.

Professor's life Kanaryova on the finish, but he is happy with the main law of a microcosm– the law of formation of ranges of atoms and ions by means of which he already proved scientific reliability of thousands of spectral lines of atoms and ions.

His scientific and educational intelligence revealed abundance of numerical criteria of reliability which prove reliability of electromagnetic structures of electrons, protons, neutrons of atomic nuclei, atoms, molecules and clusters definitively.

The set of constants of a microcosm of the most reliable criteria of reliability of electromagnetic structures of inhabitants of a microcosm collected by F.M. Kanaryov already a nerazrushima.

It will long keep lack of cogitative intelligence of many state managers of Russia acting now.

The scientific novelty of a microcosm, figuratively speaking shout asks to school studentsstudents, but the power hesitates to adopt new laws on a microcosm.

UNIVERSITY TEXTBOOK IN PHYSICS AND CHEMISTRY

FOR THE FIRST TIME THE STUDIED LAW OF THE UNIVERSE -

- CONSERVATION LAW OF THE KINETIC MOMENT

$$h = mr^2 \cdot \omega = 6,626 \cdot 10^{-34} \cdot \kappa_2 \cdot M^2 / c$$

Атом графена

Атом алмаза

Живые организмы

which forms all elementary particles, Planets, Stars and Galaxies. It rotates our earth around the Sun as well as MANY living organisms, counterclockwise.

Most of us it does pravsheruky.

$$\text{PULSE REZHIN } h = m\lambda^2 v = 1,678 \cdot 10^{-33} \cdot \kappa_2 \cdot M^2 / c$$

The LAW of the UNIVERSE MOVES - PHOTONS SVETA SO SPEED of 300000 km/c.

Studying acts of the law of the universe is impossible without this textbook which is in details describing its work.

RUSSIA, KRASNODAR is 2021

CONTENTS	3
1. INTRODUCTION	6
1.1. Scientific criticism ...	6
2. INITIAL HISTORY OF DEVELOPMENT OF EDUCATIONAL PROCESS	11
3. CRITERIA OF SCIENTIFIC RELIABILITY OF KNOWLEDGE ...	13
4. NEW LAWS OF THE MOVEMENT OF MATERIAL POINTS AND BODIES	16
4.1. Prolog ...	16
4.2. Essence of inaccuracy of Newtono-Dalamberovsky scientific mistakes ...	17
4.3. Phases of the rectilinear movement of material points and bodies...	18
4.4. The first law of mechanodynamics ...	19
4.5. The second law of mechanodynamics ...	22
4.6. The third law of mechanodynamics ...	23
4.7. The fourth law of mechanodynamics ...	24
4.8. The fifth law of mechanodynamics ...	25
4.9. Short conclusions ...	28
5. Current state of fundamental sciences	29
6. PHOTON	30
6.1. Prolog ...	30
6.2. Theory of formation of structure and movement of a photon ...	31
6.3. Criteria for evaluation of reliability of photon knowledge	48
6.4. Analytical conclusion of formulas of a photon	51

KANARYOV F. M.

The electronic manuscript of this textbook is ready to typographical works and to rescue from the current educational endarkenment of All Russian School students.

THE SCHOOL TEXTBOOK IN PHYSICS AND CHEMISTRY**1. Prolog.**

The author of the textbook in the top row on the right the 4th class Hanskoy of elementary school N 15. 1945

1956. The author of the textbook on a bench of Spit of Vasilyevsky Island after the lecture at the first year of physics department I LIE about Lorentz's transformations from which relativities of space and time follow. To agreeit or to look for the scientific truth? Search: knockedthe head!

RUSSIA, KRASNODAR 2021.

CONTENTS OF THE TEXTBOOK	P. 2.
1. PROLOGUE	1
2. DEAR PUPILS SCHOOL STUDENTS!	3
2.1. SCIENTIFIC CRITICISM	4
3. BASES OF THE THEORY OF SCIENTIFIC KNOWLEDGE	10
4. CRITERIA OF SCIENTIFIC RELIABILITY OF KNOWLEDGE	15
5. STATICS	17
5.1. Postulates of a gravitational statics	17
6. MECHANODYNAMICS	24
6.1. The first law of mechanodynamics	25
6.2. The second law of mechanodynamics	26
6.3. The third law of mechanodynamics	27
6.4. Coordinate way of a task of the movement of a point	29
6.5. Rotary motion of a solid body	30

6.6. Uniform rotation of a material ring	
7. Obviously necessary historical scientific knowledge	
8. PHOTON	32
8.1. Corpuscular theory of a photon	32
8.2. Beginning of the new theory of ranges of atoms and ions	33
8.3. Structure of a kernel and atom of hydrogen	36
8.4. Magnetic structure of a photon	43
8.5. Theory of formation of structure of a photon	47
8.6. Photon kinematics	56
8.7. The first short conclusion	62
9. ELECTRON, PROTON, NEUTRON	63
9.1. Electron	63
9.2. Weight, Charge and Radius of the Electron	65
9.3. Ring model of an electron	67
9.4. Toroidal model of an electron	68
9.5. Constants and clusters of electrons	74
9.6. About proton model	75
9.7. About neutron model	79
10. ELECTROSTATICS	80
10.1. Prolog	80
10.2. Electric sultans	81
10.3. Movement of electrons along wires	86
10.4. Air electric clusters	94
10.5. The second short conclusion	97
11. ELECTRODYNAMICS	98
11.1. Prolog	98
11.2. Interaction of magnetic poles and fields	102
11.3. Interaction of wires with current among themselves	103
11.4. Interaction of diodes	106
11.5. Charging of dielectric condensers	108
12. ABOUT KERNELS, ATOMS, MOLECULES AND CLUSTERS	110
12.1. Prolog	110
12.2. Structures of atom and atom of hydrogen (repeatedly)	112
12.3. Structures of a kernel and atom of hydrogen (repeatedly)	117
12.4. Structure of a kernel and atom of helium	130
12.5. Structure of a kernel, atom and molecule of lithium (repeatedly) ...	135
12.6. Structure of an atomic nucleus and molecule of beryllium	147
12.7. Structure of an atomic nucleus of Bohr	
12.7. Structure of a kernel, atom and molecule of nitrogen	149

12.8. Structure of a kernel, atom and molecule of oxygen	152
12.9. Structure of a molecule of water and its ions	153
12.10. Water clusters	155
12.11. Mikroskopny scaling of inhabitants of a microcosm.	168
12.12. Compton effect in the Microcosm	158
12.11. Russian transmutional electrolysis of water	168
12.13. Work of the kinetic moment in the Microcosm and in the Nature.	177
